**DETAILED ACTION**

***Response to Amendment***

1. This Office Action is responsive to the Amendment filed 6/1/07.
2. The Amendment filed 6/1/07 successfully overcomes the rejections set forth in paragraphs 1-3 of the Office Action mailed 3/7/07. Accordingly, these rejections are withdrawn.

***Election/Restrictions***

3. Newly submitted claims 15-24 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:
  - I. Claims 11-14, drawn to a process of forming a color filter, classified in class 430, subclass 7.
  - II. Claims 15-24, drawn to a liquid crystal display panel and a process of forming the same, classified in class 349, subclass 110.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different modes of operation. The process of Group I

Art Unit: 1756

operates by simultaneously forming a first light shielding layer over a black matrix during the formation of alignment bumps, while the process of Group II operates by simultaneously forming a first color filter unit and a first light shielding layer over the black matrix, then disposing a glue between a thin film transistor array substrate and the black matrix to form a sealed space. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 15-24 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

#### ***Allowable Subject Matter***

4. Claims 11-14 are allowed.

#### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1756

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
